

PAX Stretcher Mattress - TMS with temperature management system

The PAX Stretcher Mattress TMS was developed to make lying transport as comfortable as possible for patients. It is attached to the stretcher and held in place by the patient belt system.

The heating system can be switched on long before reaching the destination and offers a pleasant added value, not only during the cold season.

PAX TMS Power Pack

The battery for the TMS system

The PAX TMS Power Pack ensures a reliable power supply during use.

Even at $-10\text{ }^{\circ}\text{C}$, the battery achieves a runtime of approx. 3 to 3.5 hours, measured with an average 75 kg patient at the highest heating level. For heavier patients, the runtime is extended accordingly.

The charging time is around 3 hours. Plug-and-play operation enables simple and safe handling in everyday work.

Item no. 290010000S

PAX TMS Power Pack

PAX TMS charging system for worldwide use

The PAX TMS charging system includes the charging cradle and the power supply (100-240V) with accompanying power cord.
