

PAX RSQ Medic Backpack

The PAX RSQ Medic Backpack has been specially developed for professional use in rope, high-altitude, industrial and alpine rescue operations.

Its compact, slim design allows for maximum freedom of movement and a secure fit – even during demanding physical activities and in confined conditions.

As the **ideal backpack for first response**, it combines high functionality with well-thought-out ergonomics.

PRO

The detachable hip belt ensures flexible comfort and facilitates dynamic movement during operations.

A retractable handle also enables secure gripping and handling in technical rescue scenarios.

The high-visibility colour scheme, combined with high-quality reflective details, ensures excellent visibility – even in difficult weather and lighting conditions.

PAX RSQ Medic Backpack

For alpine operations, the backpack features separate mounts for an avalanche shovel and avalanche probe.

An external helmet mount on the front allows quick and easy access to personal protective equipment.

Inside, the PAX RSQ Medic Backpack impresses with a modular organization system.

The color-coded module bags can be operated with one hand, feature label windows, and can be removed for clear equipment organization and suspended using carabiners.

Additional mesh pockets in the front section provide extra storage space for supplementary equipment and small items.
