PAX ampoule holder XL PCI POS 3.0

The PAX ampoule holder XL PCI POS 3.0 is designed to fit the PAX Organising System (POS) and has the same external dimensions as the XL module. The PAX-Clip-In-System is mounted in the base and lid and is fitted with PAX ampoule clips as required. The centre walls, which can be folded out to the side, hold syringes, cannulas and other accessories and at the same time protect the ampoules from high external pressure. The PAX ampoule holder is fitted with fleece strips on the outside of the base to secure it in suitable backpacks. The number of ampoules that can be accommodated varies between approx. 70 and 200, depending on the size of the ampoules and the level of organisation required.

Item no. 286264510

PAX ampoule holder P5/11 L PCI 3.0

In the modular system of the PAX P5/11 backpack, this PAX ampoule holder corresponds to the space of two PAX See-Through modules „L" and is also held in position with magnets. This PAX ampoule holder currently offers the largest space for medication (up to approx. 200 ampoules). The centre walls can be folded out to the side to accommodate syringes, cannulas and other accessories, while also protecting the ampoules from external pressure.

The clip makes the difference

The new design of the PAX-Clip-In-System ampoule clips keeps everything organised and saves space. Four differently-sized clips ensure a secure hold, easy assembly and a clearly organised arrangement.
